

South West webinar series

Using data tools and evidence to improve public health outcomes in the South West

Public Health England Knowledge and Intelligence Team (South West) in conjunction with PHE Centre (South West) are launching a new series of free online webinars.

Each webinar will consist of an overview of the topic, with the opportunity to ask questions and get answers from the presenter and the webinar host. The webinars will be live and last for no more than one hour.

By joining the webinar participants should develop skills and knowledge to make using data and information in preliminary investigative work, planning and quality performance monitoring easier.
